GOLD SPONSOR

CRISTANINI CBRN
DECONTAMINATION SYSTEMS

13-14 March 2012, Sheraton Hotel and Resort, Rio De Janeiro

Learn from the best about CBRN High Visibility Events (HVE) and the CBRNe capability in South America

Speakers confirmed to date include:

- ◆ **Brigadier General Claudio Duarte de Moraes**, Chief of CTEX, Brazil
- ◆ **Colonel Ben Steyn**, South Africa National Defence Force, on FIFA World Cup 2010
- ◆ **Lt. Col. Paulo Malizia**, Chief of the Brazilian Army's CBRN Technological Centre
- ◆ **Lt. Col. Leszek Slomka**, Chief of CBRN Defense Training Centre of the Polish Armed Forces
- ◆ **Commissioner Felipe Seixas**, Federal Police, Brazil
- ◆ **Chief Bob Ingram**, FDNY, USA
- ◆ **Professor Maria Espona**, Science and Technology Professor at National Defense School, Argentina
- ◆ **Olinto Marcelo Macedo da Silva**, National Secretariat for Security for Major Events (Brazil)
- ◆ **Lt. Christian Monges**, National Commission for Prevention and Emergency Response QBR, Paraguay
- ◆ **Lt. Col. Georg Gnan**, German Army, on FIFA World Cup 2006
- ◆ **Major Warren Deatcher**, DND liaison to RCMP, Vancouver Olympics
- ◆ **Lt. Shirley Tapia**, Police Counter Terrorism Directorate, Peru
- ◆ **Lt. Col. Bernd Allert**, Nato WMD Centre, Nato's support to international HVE
- ◆ **Col. Jeffery Brodeur**, Assistant Commander US Army Chemical, Biological, Radiological, Nuclear School

CBRNe SOUTH AMERICA

Conference Programme

A more detailed programme will be available over the coming months which will be updated at www.icbrnevents.com

DAY ONE

9.00 – 9.15 **Olinto Marcelo Macedo da Silva**, Special Secretariat for the Security of Large Events, Brazil

9.15 – 9.30 **Overview about CTEX Preparedness for CBRNe Defense During HVE**
Brigadier General Claudio Duarte de Moraes, Chief CTEX, Brazil
• Mission • Capabilities • National inter agency training in CBRN • Experience from V CISM - World Military Games and FIFA - Preliminary Draw

9.30 – 9.50 **The Brazilian Navy Nuclear, Biological, Chemical and Radiological Defense System**
Captain José Luiz Corrêa da Silva, President of the Advisory Committee to the Brazilian Marine Corps Commandant in Matters Relating to the Brazilian Navy CBRNe Defense System

9.50 – 10.10 **Local Organizing Committee for the Olympics**

10.10 – 10.40 **Senior Director FBI**, WMD Directorate, USA

Coffee break – kindly sponsored by Genencor

11.00 – 11.30 **London Olympics** – TBC, UK

11.30 – 12.00 **CBRN Decontamination/Detoxication Operation in High Visibility Event and SX34 System for CBR Decon of Sensitive Equipment**
Stefano Miorotti, CBRN expert, Cristanini, Italy
• CRISTANINI CBRN decontamination and detoxification systems has been used successfully in global and international high profile events
• Our system can be used by specialized CBRN unit and are interoperable also for civil defense operation • Our decon products are multispectral CBRN and also effective against TICs • Our systems allow the user to optimize manpower, reduce maintenance and associated in reducing logistical costs

12.00 – 12.30 **Brazilian Major Events – CBRNE Strategy**
Commissioner Felipe Seixas, Brazilian Federal Police
• Overview • Counter terrorism strategy • CBRNE strategy

Lunch

1.30 – 2.00 **Networking in training: German approach to realistic burden sharing in CBRN training**
Col. Wolfgang Klos, Bundeswehr, Germany
• German military and civilian CBRN capabilities • National military training in CBRN • National inter agency training in CBRN
• Multinational CBRN training network • CBRN reach back

2.00 – 2.30 **Argentina: WMD Defense and Response System Capabilities**
Professor Maria Espona, Science and Technology Professor at National Defense School, Argentina
• Threat analysis • Armed Forces Capability • Nuclear Arena response capabilities and training activities
• Chemical Defense: the role of the CIQUIME • BW Dual Use Arena: current challenges

2.30 – 3.00 **Development of Enzyme Systems to Combat Chemical and Biological Threat Agents**
Chris Barnett, Director – Emerging Market Development, Applications R & D and Technical Service, Genencor, USA
• Enzymatic product (Defenz VX-G) consisting of OPH and OPAA to inactivate G and V agents • Product is dissolved in water and then applied to contaminated surface • Defenz BH-D creates peracetic acid when dissolved in water • Proven effective against bacterial and fungal spores
• Each of these products provides a reduced logistical burden to the warfighter

3.00 – 3.30 **V2010 Olympics - A Whole of Government Approach**
Major Warren Deatcher, Department of National Defence, Canada
• Background and Operational Situation • Key Planning Considerations • Preparations and Capability Development
• Concept of Operations – The Whole of Government Approach • Lessons Identified and Follow on Initiatives

Coffee break – kindly sponsored by Genencor

4.00 – 4.30 **CBRN Defence at Major Events - The South African Experience**
Colonel Ben Steyn, South Africa National Defence Force
• General Remarks • South Africa - background • 2010 FIFA World Cup – Approach, Planning and Preparation, Execution
• Legacy – Utilisation, Challenges, Lessons Learnt • Conclusions

4.30 – 5.00 **Integrated CBRN Solutions: Fulfil Multiple Roles with Flexible Solutions**
Sebastian Meyer-Plath, Executive Vice President Bruker Detection, MD Bruker Daltonik GmbH, Germany
• Integrated platforms in multiple roles, international market experiences • Event security concepts lessons learnt • Protection of critical infrastructure

5.00 – 5.30 **Peru in their Fight Against Terrorism**
Lt. Shirley Tapia, Counter Terrorism Directorate, Peruvian Police
• Peru's Counter Terrorist activity • Shining path

Register online **NOW** at www.icbrnevents.com
or call +44 (0) 1323 637716

DAY TWO

9.00 – 9.30 **Lt. Col. Paulo Malizia**, CTEX Brazil

9.30 – 10.00 **Poland on UEFA 2012**

Lt. Col. Leszek Slomka, Chief of CBRN Defense Training Centre of the Polish Armed Forces

- Main objectives of the organization of EURO 2012 in Poland
- Threat and risk assessment including CBRN
- Selected components of the protection system
- Estimated participation of the CBRN Def. Units in securing operation
- Civil-military, national and international cooperation

10.00 – 10.30 **Battalion Chief Bob Ingram**, Fire Dept New York, USA

Coffee break – kindly sponsored by Genencor

11.00 – 11.30 **Lt. Christian Monges**, National Commission for Prevention and Emergency Response QBR, Paraguay

11.30 – 12.00 **Antidote Stockpiling & Radiological Public Health Emergencies**

Alexander Heyl, CEO Heyltex Corporation, USA

- Internal vs. External contamination
- Selected antidotes for internal contamination
- Prussian Blue & DTPA
- Mechanism of Action
- Regulatory Aspects
- Stockpiling Considerations

12.00 – 12.30 **CBRNe Homeland Operations: Overview**

Col Jeffery Brodeur, Assistant Commander US Army Chemical, Biological, Radiological, Nuclear School

- USA CBRNe Homeland Security and Home Land Defense Define
- Overview of The USA CBRN National Response Framework and National Incident Management System
- USA CBRNe Enterprise Overview
- USA Homeland Security and Homeland Defense Training

Lunch

1.30 – 2.00 **Doug Bryce**, Deputy Joint Program Executive Officer, USA

2.00 – 2.30 **Planning of Operations and CBRN-Experience from FIFA - World Cup 2006 in German**

Lt. Col. Georg Gnan, Bundeswehr, Germany

- The overall "Command and Control structures" during the World Cup Period
- Civil & Military CBRN-Defence-Capabilities and elements in the World Cup Period
- LEIPZIG's CBRN-Defence structure and elements
- Scope of support for the FIFA World Cup 2006
- Lessons Learned for "Future High Visibility Events"

2.30 – 3.00 **Effective Bio-surveillance using Environmental and Clinical Laboratory Data**

Todd Ritter, Corporate Development Officer, Idaho Technology, USA

- Protecting high value assets from disease requires multiple, diverse data sources
- Effective bio-surveillance capabilities integrate data from environmental and clinical samples
- Understanding test systems and data is essential
- How can the data be used to more effectively identify bio-critical events?

3.00 – 3.30 **Prevention and Emergency Response Bogota – Colombia Terrorist Attacks – Public agglomerate**

Martha Lucia Rodriguez Celis, Security Specialist, Ecopetrol, Colombia

- Security situation in Bogota - Colombia – History
- Context of organized crime in Colombia
- Impact of terrorist acts in the national infrastructure and commercial
- Emergency and contingency plans - clusters of public
- Roles of the entities involved in responding to terrorist attacks

Coffee break – kindly sponsored by Genencor

4.00 – 4.30 **NATO's Support to CBRN Protection of High Visibility Events**

Lt. Col. Bernd Allert, Nato WMD Centre

- NATO supported already HVE like the Athens Olympics/Paralympics
- NATO's military capability is the Combined Joint CBRN Defence Task Force
- NATO's civil capabilities are Advisory Support Teams
- NATO is currently supporting the UEFA EURO 2012 in Poland and Ukraine

4.30 – 5.00 **Integrator System Approach to Improve CBRN Crisis Resilience**

Alain Boinet, Head of CBRN Systems, Cassidian Systems

- Considering the threats challenge and delivering a Global CBRNE Security concept
- CBRNE global security for critical site protection, border surveillance, mass events
- Description of system integration approach and key success factors
- Expected added value of a system approach

5.00 – 5.30 **TBC**, Brazilian Air Force (Confirmed)

Preparing for the High Visibility Event (HVE) threat

Security around high visibility events has always been high since the massacre at the Munich Olympics in 1972, and in recent years CBRN has had to be considered as part of that. Brazil is going to host a wide range of major sporting, and governmental, events between 2012 and 2016 – including the FIFA World Cup and the Olympics, the world's two largest sporting events.

As opposed to many northern hemisphere nations Brazil has never really faced a CBRN threat, but it appreciates that with these major events, and the attendant media coverage, that this is going to change – and is taking steps to enhance their capability. CBRNe South America is going to bring speakers that have dealt with major events within their own country and combining them with a host of regional speakers from countries such as Peru, Colombia, Paraguay and Argentina.

As opposed to other nations Brazil has the threat and the budget to match it, with a dynamic CBRN procurement and training program in the Army, Navy, Police and Fire Departments, with speakers from all these organisations and more it is the best opportunity to learn that challenges that an entire sub-continent faces.

CBRNe South America, Preparing for the HVE threat, will be the landmark CBRNE event in the region – Don't Miss Out!

Register online **NOW** at www.icbrnevents.com

CBRNe SOUTH AMERICA

13-14 March 2012, Sheraton Hotel and Resort, Rio De Janeiro

Supporting Partner Organisations

Federal Police: The Federal Police of Brazil main assignments are the investigations of crimes against the Federal Government or its organs and companies, the combat of international drug trafficking and terrorism, and immigration and border control police (including airports and water police). It has jurisdiction over all national territory and has a modern and functional structure that enables planning, coordination and centralized control and decentralized execution. Its current structure allows for excellent performance, and encourages integration with the various federal government agencies

CTEx: The Army's Technology Center, or Centro Tecnológico do Exército, is located in Guaratiba, just outside Rio de Janeiro, and is the Army agency for military CBRN defence research. CTEx provides scientific and technological advice through the Department of Defense QBN. The QBN Defence Division conducts the following activities: identifying CBRNE agents in their laboratory facilities; specification of technical performance of CBRN defence equipment; selection and testing of CBRN defence equipment; development of sampling methodologies; training in response to disasters with CBRNE agents; operating a mobile laboratory for the identification of CBRNE agents.

ArgIQ: ArgIQ is a newly formed non for profit organization devoted to Information Quality. Defence against WMD is one of their core projects and has been an ArgIQ priority for a number of years. ArgIQ staff members have more than 10 years of experience in the field and are lead by Prof. Maria Jose Espona, biologist, currently doing her PhD in International Relations. In the last years, ArgIQ supported meetings about biological weapons (Challenges to the Scientific and Technological Progress: Biological Nucleus) and nuclear weapons (Nuclear Cooperation: Argentina and Brazil Case Study) both with international and local participants. Prof. Espona participates in several international projects, for example the BWPP REvCon Discussions and the translation to Spanish of the EMR.

SCS: SCS is an established UK Defence and Security Consultancy, providing independent expert advice to Defence and Civilian Customers in the UK and Internationally. Their aim is to provide cost effective solutions, combining technical knowledge and practical expertise, to deliver tangible value to their customers. They have deep expertise and a strong track record across a broad range of delivery areas – especially in the logistics, communications and information management, training support, resilience and crisis management, delivery and management of complex system and support of operations in high threat areas.

Gold Sponsor

CRISTANINI S.p.A. is an Italian Company established in 1972 and World market leader in Development & Production of systems and products for the decontamination and the detoxification of chemical, biological, radiological and nuclear agents (CBRN). It is, most of all, the adherence to technological innovations that represents the basis of Cristanini's outstanding achievements. The Company has a quality certification NATO AQAP 2110 and ISO 9001 and the Manufacturer Certificate Nato Nr. 5009, With more than 30 years of experience, CRISTANINI has developed a wide range of capabilities in relation with CBRN detoxification and decontamination, for military and civil purposes. R&D PROGRAM are conducted in cooperation with University Institutes and Military LABs.

**CRISTANINI CBRN
DECONTAMINATION SYSTEMS**

Silver Sponsors

Bruker Detection Corporation is a worldwide leader in supplying detection instruments, products and systems for substance detection and pathogen identification in security, defense, and law enforcement applications. Our broad technology base includes ion mobility spectrometry, mass spectrometry, Fourier Transform IR spectrometry and semi conductor based radiation detection. www.bruker-detection.com

Cassidian, an EADS company, is a worldwide leader in global security solutions and systems, providing Lead Systems Integration and value-added products and services to civil and military customers around the globe: air systems (aircraft and unmanned aerial systems), land, naval and joint systems, intelligence and surveillance, cyber security, secure communications, test systems, missiles, services and support solutions. In 2010, Cassidian – with around 28,000 employees – achieved revenues of €5.9 billion. EADS is a global leader in aerospace, defence and related services. In 2010, the Group – comprising Airbus, Astrium, Cassidian and Eurocopter – generated revenues of €45.8 billion and employed a workforce of more than 121,000. CASSIDIAN – Defending World Security

Genencor is a world leader in industrial biotechnology and a pioneer in enzyme innovation with more than 400 patented enzyme technologies. Genencor improves process and product performance for a range of industries. As part of a large global organization, Genencor has a manufacturing and distribution network that spans more than 40 countries. In collaboration with customers, technology leaders and other stakeholders, Genencor supplies competitive, biobased solutions that create value throughout the supply chain, from raw material to finished product. DuPont acquired a majority stake in Danisco A/S, which includes its Genencor division, in May 2011. Genencor enzymes and enzyme production will now operate within DuPont Industrial Biosciences. For more information, please visit www.genencor.com.

Heyl chem. pharm. Fabrik Berlin, Germany and Heyltex Corporation of Katy, Texas specialize in the international distribution of medical countermeasures for radiological public health emergencies. Our mission is to support the Homeland Security & counter-terrorism communities with: Closing the R&D gap in radiation countermeasures and develop new indications & formulations to cover all population & radiological isotopes; Developing commercial strategies addressing sustainability of radiation antidotes on international markets; Raising public awareness & channel expert understanding of radiation public health emergencies and the importance of medical countermeasures. We manufacture and distribute Prussian Blue, DTPA and other chelating agents.

Idaho Technology produces the most sensitive and reliable BioSurveillance products that span the range of operations from the lab to the field and clinical diagnostics to environmental surveillance. The hand-carry RAZOR EX is ruggedized for field use to provide militaries, civil defense, first responders, and security personnel the capability to identify biotreatments in suspicious powders and substances. The laboratory-based FilmArray System provides incomparable ease-of-use by integrating advanced sample prep with sensitive real-time PCR detection to simultaneously identify dozens of threats with high confidence. This multi-use instrument identifies pathogens in clinical or environmental samples through a variety of disease panels.

Exhibitors – to exhibit please contact david.levitt@cbrnworld.com

AirBoss-Defense is world renowned for the manufacture and supply of CBRN Personal Protective Equipment (PPE). AirBoss-Defense also manufactures Fire Fighting and Extreme Cold Weather (ECVW) footwear, multi-purpose safety boots and a wide range of industrial extruded and moulded rubber engineered products for the defense market.

Cegelec mobilizes its skills as an integrator of solutions and systems for the Defence & Security business:

- Expandable shelters covering the whole range of operational requirements: CBRNe (decontamination module) and medical applications (mobile hospital, ICU, sterilization), command posts
- Power generation or conversion. Mobile air conditioning units
- Protection of critical assets.

Falcon Communications, in addition to CBRNe South America also organise CBRNe Convergence, the world's leading annual conference and exhibition bringing together CBRNe professionals from around the world to discuss and learn best practice. Our fifth annual CBRNe Convergence will take place in Norfolk, Virginia, October 30-November 2, 2012. Falcon also publish CBRNe World and HazMat Responder World magazines. Details at www.cbrnworld.com

EUROLITE CBRN products have a reputation for best-of-the-class chemical & physical protection, affordable customized solutions, lightweight, easy to store, 15+ years shelf-life, design & production experience since 1977, global sales to major military and civil defence forces, NSNs, NFPA certified: PPE Suits, casualty care, inner tents, waste bags etc... www.goetzloff.com

ICOR Technology Inc. is a life-saving organization specializing in the design and manufacture of the suite of CALIBER® Robots, and other essential high-quality, protective security equipment for CBRN, EOD, and Tactical units worldwide, including units in Canada, USA, UK, the Middle East, and Asia.

Airsense Analytics is the provider of C detection equipment for demanding safety applications such as accidents and catastrophes including hazardous materials, security at public events and supervision of critical cal infrastructures. With its complete portfolio of detection systems, Airsense is able to cover all steps in civil NBC intervention..

Chemring Detection Systems, Inc. offers an advanced line of point and standoff chemical and biological agent detectors and standoff explosives detection systems. Our chemical detection products include the hand-held JUNO® vapor detector and a Standoff Chemical Detector (I-SCAD®). Biological detection systems include the ATHINA Biological Security System (ABSS).

First Line Technology, LLC is manufactures and supplies Out of the Box Solutions for first responders and the military that has established itself as a leader in product development and deployment with innovative, simple solutions like heat-activated PhaseCore, Fibertect (cold weather dry decon), and the AmbuBus (Bus Stretcher Conversion Kit).

GermFree and Dycor Technologies provided protection against airborne threats for visitors and athletes at the Vancouver 2010 Winter Olympics. Our team provided this international event with real-time monitoring of indoor and outdoor environments, sampling anomalous events, immediate onsite laboratory/forensic analysis, and integration with Canadian security's command and control system.

With more than 10 year's experience in chemical, biological, radiological and nuclear (CBRN) systems, Indra offers integrated solutions that span all the stages required to mount a solid response to CBRN threats. Our mobile laboratories can be used to identify CBRN agents in the field, enabling CBRN units to implement the necessary measures in the event of an attack or industrial incident. The Ministry of Defence of Turkey awarded Indra a contract to deliver a deployable mobile laboratory for proved analytic identification of Chemical, Biological, Radiological-Nuclear (CBRN) threats.

Avon Protection Systems has established itself as the global market leader in CBRN Respiratory Protection & Defence system technology. Our 80 year pedigree in CBRN mask design and production has placed us at the heart of numerous national defence strategies and tactical PPE protection for clients including the US DoD, and the UK's MoD, and over fifty other national civil protection programmes. www.avon-protection.com

Dugway Proving Ground (DPG) is the world's premier destination for chemical and biological defense testing. As the US Army's designated Major Range and Test Facility Base for chemical and biological defense-related programs, DPG is the lead tester for US and allied chemical and biological defense equipment and NBC contamination survivability of defense materiel.

FLIR Systems is the world's largest supplier of detection and protection sensors and systems. With the recent acquisition of ICX Technologies, FLIR now offers advanced capabilities to detect threats in all CBRNE segments-chemical, biological, radiological, nuclear and explosives. These compact laboratory calibre systems are in use across a broad spectrum of applications, including incident response, force protection, field based forensics and critical facility security. As both a systems provider and technology supplier to the defense industry, FLIR Systems leverages unparalleled technical expertise to address the emerging challenges of our time. www.flir.com/detection

For over thirty years, GIE Défense NBC has gathered together the main French companies in the NRBCE field in order to offer their French and foreign customers the best solutions in terms of defence. Our customers are the armed forces, fire brigades, security services, police forces, industrialists, as well as doctors, hospital staff, emergency services personnel and urban communities.

Bertin Technologies are providers of biological and chemical threat detection systems. Early detection or identification of biological and chemical aerosolized weapon attacks are essential components of biodefence. To help to get an adapted response, Bertin has developed the Coriolis® air samplers, the KIM analyser and the gas cloud detector Second Sight®. www.bertin.fr

The U.S. Army Edgewood Chemical Biological Center (ECBC) is the lead military laboratory for chemical and biological defense technology. Employing more than 1,600 professionals in chemistry, biotechnology, engineering and risk management and related fields, ECBC maintains the necessary in-house expertise, equipment and facilities to develop and mature breakthrough technologies.

HDT Global is a leading provider of mobile-military and emergency response solutions including rapidly-deployable tactical shelters, highly engineered environmental control and power equipment, and nuclear, biological, and chemical collective protection systems. Our products are currently serving the U.S. and allied military units deployed worldwide.

Intelgard design and manufacture effective tools for CBRN decontamination, fire suppression, and hazmat remediation. Designed for usability and versatility, use the same piece of equipment to decontaminate an office, suppress a fire or clean up a hydrocarbon spill. Providers of the Macaw backpack, large-scale High Mobility Decontamination System and our EasyDECON DF200 decontamination solution.

Joint Program Executive Office for Chemical and Biological Defense: Mission: Provide Research, Development, Acquisition, Fielding and Life-Cycle Support of Chemical, Biological, Radiological and Nuclear Defense Equipment, Medical Countermeasures and Installation and Force Protection Integrated Capabilities Supporting the National Strategies. Vision: An Agile, Results-Oriented, and Transformational Acquisition Enterprise Delivering Net-Centric, Modular; Tailorable and Multi-Purpose Capabilities to the Nation. www.jpeocbd.osd.mil

Exhibitors – to exhibit please contact david.levitt@cbrnneworld.com

Meridian Medical Technologies™, Inc., has more than 50 years of experience creating specialized products for emergency responders and military personnel around the globe. Meridian's antidotes are stocked by the U.S. Department of Defense, the U.S. Department of Homeland Security, emergency medical services personnel and more than 30 nations around the world.

MERIDIAN
MEDICAL TECHNOLOGIES™

Paul Boye is a worldwide leader in research and development and mass production of CBRN/F protective suits and offers complete range products to meet the requirements of armed forces and civil defence (soldiers, decontamination experts, aircraft pilots, special forces, police, military police, medical personnel, fire fighters). Used in 38 countries and by international organisations such as UNO, OPCW, IAEA, and NATO.

Paul Boyé
TECHNOLOGIES

Scott Safety are world leaders in the design and manufacture of respiratory protection. Scott's technologies demonstrate configurable and integrated solutions for high protection factor – low user burden facemasks and filters, powered air purifying respirators and positive pressure breathing apparatus especially for CBRNe and damage control operations. Scott's customer base includes military and civil defence customers on all 6 continents.

SCOTT
SAFETY

Telops is a leading supplier of high performance infrared cameras and hyperspectral imaging systems. Telops has developed the FAST-IR 1000, the first 1,000 FPS Infrared Camera, the HD-IR 1280 High Definition Infrared Camera, the TEL-1000, and the powerful Hyper-Cam providing information rich data for a wide variety of applications.

TEL  **OPS**

Trelleborg Protective Products is a world leading producer of personal protective equipment and related products. Through the world renowned brand names Trelchem® and Viking, we develop and manufacture chemical protective suits, dry diving suits and a wide range of custom-made products. Trelleborg Protective Products is part of Trelleborg, a global industrial group whose leading positions are based on advanced polymer technology. The Trelleborg Group develops high-performance solutions that seal, damp and protect in demanding environments

TRELLEBORG

Mirion Technologies is a global provider of radiation detection, measurement, analysis and monitoring products and services. Our range of equipment covers the different requirements necessary for each stage of investigation: Early warning, search and confirmation of the alert, measurements and identification of the products detected.

 **MIRION**
TECHNOLOGIES Health Physics
Division

Proengin has developed biological and chemical warfare agents field detectors using flame spectrometry: AP4C, handheld chemical detector, for CWA, TICs and others (Novichok), AP4C-V, aboard wheeled and tracked reconnaissance vehicles, AP4C-F, on critical buildings and ships, MAB, for biological alarm, AP4C-FB, for full CBRN detection.

PROENGIN
Chemical and Biological Detection Systems

SERB is an independent GMP certified pharmaceutical company dedicated to the development and distribution of essential drugs meeting Public Health needs. SERB is focused on Critical Care including Toxicology and Bio-defense proposing a large range of antidotes to chemical poisonings.

 **SERB** LABORATOIRES
WWW.SERB-LABO.COM

Thales offers armed forces and civil security authorities a unique set of capabilities based on more than 20 years of experience. In addition to its solid background in all the technologies required for effective CBRN security systems, Thales is recognised throughout the world for its systems integration expertise. As a world market leader in mission critical solutions for defence and security, Thales is positioned today as the systems architect of choice for CBRN solutions.

THALES

Since 1961, TSI has provided instrumentation to industry, government, and researchers. TSI has 20+ years of experience in mask testing and biodetection, with systems used by government and military organizations in over a dozen countries. TSI products have been deployed in every major military operation since Operation Desert Shield.

NBC Sys: Our range of products cover detection (chemical & biological), individual and collective protection (gas masks, filtering canisters, air conditioning and filtration installed onboard vehicles or in ships) as well as decontamination (aircraft, vehicles, sensitive equipment and persons) With 80% of its workforce comprising of technicians and engineers, NBC-Sys can rely on expertise based on creativity, knowhow and customer support.

QinetiQ North America delivers world class technology and responsive solutions to government agencies and commercial customers for many of their most urgent and complex challenges. Talon and Dragon Runner robots are currently in use by the U.S. military, coalition forces first responders, bomb squads and tactical teams throughout the world. www.QinetiQ-NA.com

Technology Solutions Group

Telerob develop machines, equipment and systems that protect or replace human beings in situations where their presence would be either impossible or place them at great risk. The Telerob range of products encompasses EOD robots (tEODor and telemax), completely equipped bomb disposal vehicles (TEL600), bomb disposal equipment, non-magnetic special tools (NOMATOOLS), as well as manipulators for servicing, maintaining and dismantling nuclear facilities (EMSM). Telerob has also developed an unmanned system for rescue forces and first responders to deal with hazardous materials, toxic substances or even biologically harmful materials such as viruses or bacteria.

TELEROB

Thermo Scientific handheld chemical identification tools are field-ready instruments that deliver precise, actionable intelligence to military personnel and first responders around the world. Products include AhuraFD™, FirstDefender® RM, FirstDefender RMX, TruDefender® FT and TruDefender FTi for solid and liquid chemical identification and TruDefender FTG for headspace gas identification.

Delegate Registration – CBRNe South America 2012 – A Falcon Communications event

Book online at www.icbrnevents.com or alternatively complete the form below.

Please return your form to the CBRNe Conference Office by Fax: +44(0)1323 637777 or Email: cbrne@confpeople.co.uk

If you have any queries please contact us on +44 (0) 1323 637716

Delegate Fees	USD	Euro	GBP
Government Package - Full access to all conference sessions and exhibition areas for Tues 13 and Wed 14 March, conference materials, all refreshments during the conference and drinks reception Tues 13 March. Does NOT include accommodation and dinners.	\$895.00	€ 660.00	£580.00
Government - Local Package - As above	\$750.00	€ 560.00	£490.00
Commercial Package - As above	\$1495.00	€ 1080.00	£945.00
Exhibitor - Conference Delegate Package - As above	\$895.00	€ 660.00	£580.00
Exhibitor - Guest Package - As above	\$895.00	€ 660.00	£580.00
Stand Attendees Package - Access to exhibition, refreshments during conference days and drinks reception Tues 13 March. Does NOT include access to conference sessions, accommodation or dinners.	\$200.00	€ 145.00	£125.00

We are also pleased to offer the following group discounts: 5-10 delegates – 10% discount

If you would like to make a group booking please email the CBRNe Conference Office at cbrne@confpeople.co.uk and you will receive a promotional code with further instructions on how to book online.

Exhibiting: If you are interested in exhibiting at CBRNE Convergence please tick here and we will contact you with details.

Dietary Requirements: If you have any special requirements with regard to your diet, please tick below. Please be very specific.

Vegetarian (eat fish) Vegetarian (do not eat fish) Vegan

Other: _____ (e.g. nut or wheat allergy / kosher / Halal) – **Please be very specific**

Booking Terms and Conditions: Payment is due within 7 days or prior to the start of the event (whichever is soonest). If payment is not received prior to the start of the event entry may be refused. All late registrations (10 working days or less prior to the event) must be paid by credit card. Receipts of payment will be issued on request.

Cancellations: Agreeing to the terms and conditions confirms that you will be subject to invoicing/credit card charges for the total payment amount based on your indicated options above. In the event that you have to cancel your place, you will be fully subject to the cancellation policy, and the total invoice amount will remain payable, even if you cancel your place before paying your fees. Payment is required within 7 days of invoice date or prior to the start of the conference, whichever is soonest. If payment is not received within this time or before the start of the event the organisers reserve the right to refuse entry. Substitutions may be made at no extra charge. Alternatively you may choose a credit note for the full value of the registration fee, which may be put towards another Falcon Communications event.

Programme Changes/Information: It may be necessary, for reasons beyond the control of the organiser, to change the programme content, speakers and/or timings. Falcon Communications is not liable for any changes. I confirm that I have read the registration terms and conditions and wish to continue with this booking.

Data Protection

Your name and organisation will appear on a delegate list published at the event. If you do not wish to allow this please tick this box:

By completing this booking you are consenting to your personal information being passed onto relevant parties involved with this conference. If you do not wish to receive future correspondence from Falcon Communications or other related parties regarding future events or developments please tick here:
